

## FLUTTER TEAM - WEEK 4

Hey guys, Hope you learnt something new in week 3 task.

As we completed the Authentication, let us start giving life to our app.

### Task 4:

The fourth task is all about prototype.

- ➔ Post: user can post their thoughts in our apps, which can be viewed by another user.
- ➔ Homepage: Extract all user posts and display in the homepage.
- ➔ User profile: On clicking user profile from the post header, you need to display the user details followed by their posts.
- ➔ You can create various collections in cloud firestore to complete this feature.
- ➔ Be creative in designing a structured database and User interface.

- ❖ Must be familiar with firestore to complete this task.
- ❖ Brownie points for those who go beyond the requirements.

# THANK YOU!
